7 days later

PET and DVM-FRIENDLY

- EFFECTIVE
- FAST-ACTING
- SAFE (NO KNOWN SIDE EFFECTS)
- UNIQUE
- PATENT-PENDING
- REVENUE-PRODUCING (FOR DVMS)

INFECTIONS TYPICALLY RESOLVE IN 1-3 DAYS.

**RAPID WOUND RESPONSE OCCURS WHEN WOUND PHYSIOLOGY UNITES WITH
AVIV POWDER OR GEL.**

How to apply for open wounds:

To prevent / clear infection and speed healing, apply topically twice daily to affected area(s) until resolved (1/8" coating over all surface areas and beyond edges). Aviv Powder and Gel may be used together for optimal consistency.

For low viscosity (wet, draining) → Aviv Powder

For high viscosity (dry, non-draining) → Aviv Gel

How to apply for suture lines:

Apply Aviv Powder and / or Gel once daily over all surface areas liberally.
